FABREEKA EXPANSION BEARING APPLICATION SPEC SHEET

The following questions need to be addressed for proper bearing design.

1.	The maximum available bearing area depth, width and height.
2.	The maximum expansion expected and in which direction.
3.	The maximum vertical load on each bearing.
4.	The maximum beam rotation in radians at the bearing area.
5.	If any slots/ holes are required. A bolt pattern must be supplied.
	9

Any technical questions should be directed to Fabreeka's Engineering department.
